TAMARIS

A global security solution

TAMARIS offers an operational solution on both a human and technological level based on its recognised expertise in the fields of security, fire safety, terrorism, cybercrime, marine and port security, the organisation of medical assistance and major events.

Strategies, organisations, processes, cultures... our customers have different needs so we offer bespoke solutions. From a single business activity to multiple services, our offers are custom built and scalable in order to address the increasingly multifaceted malicious acts through the creation of dedicated structures.

AREAS OF EXPERTISE AT THE HEART OF SECURITY

- APPRAISAL

SURVEY IN ALL BUSINESS SECTORS

- SERVICE
- NATIONAL DEFENCE
- PETROCHEMICAL
- LOCAL AUTHORITIES
- INDUSTRY
- HOSPITALS
- CULTURE
- BIG EVENTS

Dedicated structures

➔ ARMED SURVEILLANCE MISSIONS

TAMARIS is able to provide armed Enhanced Security Officers for missions carried out in circumstances that expose officers to danger, or when people are in places under surveillance that are at high risk of being targeted. The conditions of acquisition and possession, conservation, transportation of weapons and the particular requirements of use are laid down in Decree no. 2017-1844 of 29 December 2017 concerning the carrying out of certain private security activities involving the carrying of a weapon. (DECREE NO. 2017-1844 OF 29 DECEMBER 2017)

➔ CLOSE PROTECTION MISSIONS

TAMARIS PROTECTION is able to respond to all specific requirements and provide an appropriate close protection solution. The teams assigned to these missions, experts in security and the protection of people, and specialised in difficult missions, are part of private security activities and have typically served in highly specialised units. They may be armed when providing protection to someone who is at high risk of assassination. On a case by case basis, the French Ministry of the Interior may authorise the close protection officer to carry and transport one or more weapons.

Highly-specialised expertise in all areas of private security

TAMARIS SÉCURITÉ PRIVÉE is able to meet all demands relating to the protection of movable or immovable property. Its agents have recognised expertise in all of the following missions:

- **Fire safety**

Trained in the prevention and reduction of fire risks, fire safety officers work in high-rise buildings (IGH) or establishments open to the public (ERP). They are responsible for verifying and maintaining the resources that contribute to fire safety and for calling and receiving the emergency services in the event of an incident. They also regularly conduct awareness sessions with employees and train staff in fire safety.

- **Security dog surveillance**

Security dog handlers form a man-dog team that provides a deterrent presence and can intervene rapidly thanks to surveillance patrols. Of course, these teams are trained to act in full compliance with the regulations in force.

- **Reception and access control**

These officers are the first link in the security chain. Responsible for reception and access control missions, they ensure the control of the entrances and exits of staff, service providers and customers of the user company.

- **Mobile security**

Specialised in surveillance patrols, these officers seek to prevent malicious acts, fires and intrusions, and are prepared for interventions aimed at carrying out doubt removal.

Fire and individual rescue

The issues around fire safety and assistance to individuals faced by companies and organisations are becoming increasingly complex and regulated.

To deal with these challenges, TAMARIS SÉCURITÉ PRIVÉE will support you by providing you with teams specialised in fire prevention, anticipation and protection through surveillance and human intervention.

An ability to cover all types of buildings – industrial, establishments open to the public (ERP), high-rise buildings (IGH), all business sectors and all special risks.

TAMARIS SÉCURITÉ PRIVÉE teams have the experience and knowledge required for the following missions:

- Helipad Fire Safety Service
- Aircraft Rescue and Fire-fighting Service (SSLIA)
- Fire-fighting service for Installations Classified for the Protection of the Environment (ICPE)
- Fire Safety and Assistance to Individuals (SSIAP)
- Industrial Fire-fighting and Protection Service

AIRPORT

Airport and Aircraft Security

Ensuring the security of airports in this day and age is part of the global fight against terrorism. Although “conventional” security issues are still present within these giant airport structures, today’s threats and constraints, related to the increase in terrorism, make security officers defenders of both national integrity and French territory.

- **Specific training**

To respond to the challenges of the industry, the men and women of Air&Port Services receive specific training, at the end of which they are certified and approved by both the Prefect and the State Prosecutor. In addition, they must undergo periodic training as part of their follow-up training.

TAMARIS SECURITE PRIVÉE applies systematic self-monitoring measures.

- **Multiple missions**

Screening, escort of sensitive shipments or cargo, transport of dangerous, high-value and confidential . goods, etc. are part of the everyday business of the men and

women working in Air&Port Services. But their role also involve the protection of senior officials, VIPs or individuals who are prime targets for attack, or more simply incivility, malicious acts, etc.

- **Malicious acts and incivilities**

Air&Port Services officers are also trained to deal with anti-social behaviour of all kinds, ranging from theft and insults to behaviour deemed inappropriate. Just like soldiers of the Opération Sentinelle (Sentry duty), the Air&Port Services teams conduct patrols intended to deter, control and reassure.

Awareness Training

Know what to do when faced with an imminent threat. Know how to manage crisis situations (stress management, adaptation of behaviour, attitude to adopt, etc.).

Low-intensity crisis

Conflict management
(general public)

Medium-intensity crisis

Suicidal crisis (Members of the Management Committee (CODIR), Middle Management and all employees)
(support relationship)

High-intensity crisis

Hostage taking & armed attack
(general public)

Awareness in the prevention and management of a terrorist risk

Conditioning on how to act if faced with an attack
Warning according to the type of event
Protection methods
Confinement methods according to the type of risk
Evacuation techniques
(Members of the Management Committee (CODIR), Middle Management and all employees)

Professional ethics

TAMARIS SÉCURITÉ PRIVÉE HAS GREAT RESPECT FOR ITS PROFESSION AND ITS IMPORTANCE FOR THE SOCIETY IN WHICH WE LIVE. THAT IS WHY ITS EMPLOYEES AND LEADERS ADHERE TO A STRICT CODE OF ETHICS AND PROHIBIT ANY ACTION THAT COULD DAMAGE THE IMAGE OF THE COMPANY, BUT ALSO THE PROFESSION AS A WHOLE.

➔ Accordingly, all of the company's employees undertake to:

- Strictly comply with all of the laws and regulations in force, in particular, the highway code and the professional and social legislation applicable to us.
- Inform and advise customers honestly and openly in all circumstances.
- Act in accordance with the code of ethics across all levels of service from canvassing until delivery of a service offer.
- Make customer satisfaction a professional priority by delivering the highest quality service in line with the commitments made..

MEASUREMENT OF THE IMPACT OF OUR CSR INITIATIVES

In order to improve its CSR policy, TAMARIS SÉCURITÉ PRIVÉE has introduced a CSR barometer. This tool, which is used every six months on a sample of employees, enables the company to reliably monitor its actions with regard to its employees, and, based on the results, continue with or correct its approaches.

CODE OF ETHICS FOR PRIVATE SECURITY ACTIVITIES

Strengthened management

AT ALL LEVELS, TAMARIS SÉCURITÉ PRIVÉE HAS THE HUMAN AND TECHNICAL RESOURCES REQUIRED TO PROVIDE ITS CUSTOMERS WITH THE HIGHEST QUALITY SERVICE

5 MAIN OPERATIONAL ARMS

Equipped with demanding and high specialised staff, their mission is clear: to develop qualifications, expertise and professionalism across all levels of the company.

Experienced men with a background in the special forces on key positions

FABRICE
TIPHINEAUD

Executive Vice President

/Previously
Former Senior Advisor on the Prospective and Institutional Relations Board-
Security and Safety Manager of COLAS Group

At the basis of any security system are first of all the men and women who are its vectors at the same time as the incarnation.

Tamaris Private Security has chosen the contribution of staff with experience in the major bodies of the State.

They have developed skills specific to the regional structures from which they originate.

For Tamaris Sécurité Privée, this guarantee guarantees the quality of all personnel involved in the private security sector in terms of professionalization and sharing of skills with other agents.

Audit, advice, assistance and economic security

Recent obligations concerning the protection of sensitive sites, the security of activities of vital importance (SAIV), SEVESO, major events, and French interest abroad, the criminal liability of directors, concerns of insurers, as well as the expectations of the operators concerned, have led TAMARIS SECURITE PRIVÉE, organised around recognised experts and specialised companies, to broaden its field of expertise in the areas of advice, decision-making support, awareness and economic defence.

- **Risk exposure analysis**

Network decoding - Counterfeit risk management - Injury to reputation - Political analysis - Security analysis - Situation monitoring - Tracking and warning - Due diligence
